
OUTSOURCING IT. FLEXIBILITY AND RELIABILITY.

IT system implementation, migration, update and upgrade projects require verifying the suitability of the existing hardware platform or choosing a new one. As part of our projects, we advise our Clients in this regard, taking into account the following: the functional scope of the system, the operations performed in the system, the business type, and company strategy and development plans. We help companies determine if they are capable of maintaining the IT infrastructure on their own and compare the offers of IT outsourcing vendors based on our long cooperation with the following Data Centres: Beyond.pl, Sinersio and Polcom.

In this day and age, we are forced to work under pressure in a rapidly evolving environment and bear a burden of responsibility. By outsourcing your hardware platform, you can reduce this burden and transfer it to an external partner. Stable environment, high availability and data security are things we all seek.

Michał Sarna
SAP Support Manager, Hicron

FUNCTIONS OF THE SOLUTION

- ▶ Advising on:
 - ▶ Implementation projects
 - ▶ Migration projects
 - ▶ Upgrade projects
 - ▶ IT system development
 - ▶ Operation improvement
 - ▶ Planning strategic development based on IT solutions
- ▶ Comprehensive service
 - ▶ Servers
 - ▶ Network infrastructure
 - ▶ Operating system licences
- ▶ Secure environment
- ▶ Technical monitoring

BENEFITS OF WORKING WITH US

- ▶ Objectivity: independent opinion, focusing on your technological needs
- ▶ Full customisation: helping you select a solution that best meets your business expectations (whether existing or future)
- ▶ Lower costs: helping you pick the most economical solution (both now and in the future); upon request, we can help you determine the ROI for the selected outsourcing option
- ▶ SAP system administration: if you choose to use our SAP administration services, we will cooperate with your own team and Data Centre personnel
- ▶ Confidence: hardware does not become functionally obsolete
- ▶ Scalability: easy development of the environment
- ▶ Competences: you do not have to be competent in hardware infrastructure administration
- ▶ Savings: no need to spend money on your own infrastructure
- ▶ Budget: CAPEX or OPEX
- ▶ Guarantee: guaranteed high availability and reliability
- ▶ Security: guarded data, protection against flooding, etc.

OUTSOURCING IT. FLEXIBILITY AND RELIABILITY.

BENEFITS OF THIS SOLUTION

SECURITY

Outsourcing is safer than using resources of your own. Contracts signed with outsourcers specify the time of hardware infrastructure availability guaranteed by the Partner – usually, this reaches almost 100%.

QUALITY

With state-of-the-art IT solutions and cutting-edge technologies, outsourcers can investigate problems quicker and better.

CONFIDENCE

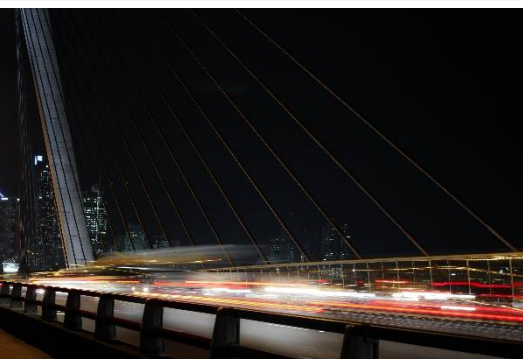

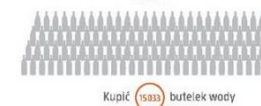

Our contracts, service level specifications and large number of joint international projects ensure Hicron's excellent reputation as an outsourcing partner.

Ile można oszczędzić ba outsourcingu?

31 Miesięczny koszt utrzymania serwerowni to 29 550 zł.
Koszt outsourcingu to przeciętnie 7 000 zł na miesiąc.

Co daje różnicę **22 550 zł**. A można za to:
